SUMMARY

As a Full Stack Developer with a background in design and a strong ability to integrate creativity, I am skilled in front-end and back-end development, API creation, and technical documentation. My expertise in multiple programming languages and frameworks, including HTML/CSS, JavaScript, and Node.js, allows me to effectively implement technologies to develop user-friendly applications with clean code. I am a resourceful problem-solver with experience in developing content for various mediums. I am excited to bring my skills and passion for content creation to the Web Developer role at Inventive and contribute to the development and execution of successful strategies for diverse audiences.

TECHNICAL SKILLS

Languages

HTML, CSS, JavaScript, SQL

Technologies: jQuery, Bootstrap, GIT, GitHub, Express-Handlebars.js, Express.js, Node.js, Sequelize, MySQL, APIs, Filesystem API, AJAX requests, Adobe Suite (Photoshop, Lightroom, Premiere Pro, After Effects)

Workflow/Architecture: OOP, REST, MVC, site deployment on Heroku, Netlify and GitHub pages, mobile-first design approach.

PROJECTS

Backend project

README Generator | [Link to GitHub](#) | [Walkthrough video](#)

- A command-line application that dynamically generates a professional README.md file from a user's input using the Inquirer package from Node.js
- Responsible for the entire project
- JavaScript, **Node.js**, Inquirer package

Backend project

Employee Tracker | [Link to GitHub](#) | [Walkthrough video](#)

- A command-line application for managing a company's employee database in MySQL. The application allows a user to view, add, and edit departments, roles and employees
- Responsible for the entire project
- **Node.js**, Inquirer package, **MySQL**

Backend project

Note Taker | [Link to GitHub](#)

- An application that can be used to write, save, and delete notes. Uses an Express.js back end and saves and retrieves note data from a JSON file.
- Responsible for the back-end http request functionality
- **Node.js, Express.js**, JSON data retrieval and writing, File System module

Frontend project

Reach X Website Re-design | [Link to GitHub](#) | [Link to Deployed Project](#)

- A full website and logo re-design for Reach X marketing company
- Responsible for the frontend design
- Used Bootstrap, **JavaScript AOS Library**, CSS, Photoshop

Front + backend project

UNI-QOL | [Link to GitHub](#) | [Link to Deployed Project](#)

- An app that allows users to search for a city and receive the quality-of-life summary as well as the current weather for that city
- My core responsibility for this project was the front-end design
- Used a **weather API, quality of life API**, Foundation framework, CSS, JavaScript

Front + backend project

Weather Dashboard | [Link to GitHub](#) | [Link to Deployed Project](#)

- A website which allows the user to search for a city and receive information about the current and future weather conditions for that city and that city is added to the search history
- Responsible for the entire project
- Used **a weather API**, Bootstrap, JavaScript, CSS, Photoshop
